SUMMARY

PGDM (Finance) professional with an engineering background and experience in data analytics, financial analysis, fraud detection, risk analytics, operational analytics, and investment research. Skilled in using Python, SQL, Advanced Excel, Power BI, and VBA to analyze datasets, identify patterns and anomalies, generate actionable insights, and support data-driven business decisions. Exposure to statistical analysis, machine learning, regression, classification, clustering, decision-tree based analysis, scenario analysis, and predictive analytics through academic and analytical projects. Strong ability to translate complex data into concise business insights, collaborate with cross-functional teams, prioritize high-impact opportunities, and solve business problems through analytical thinking.

EDUCATION

Fortune Institute of International Business (FIIB) 2024 – 2026

PGDM (Finance)
CGPA: 6.73/10

Institute of Technical Engineering and Research 2018 – 2022

Bachelor of Technology
CGPA: 7.63/10

WORK EXPERIENCE

Transcom Mar 2026 – Present

Wealth Management Associate Ops Analyst

- Analyze customer, account, and transaction-level data to identify patterns, anomalies, behavioral trends, and risk indicators supporting data-driven decision-making.
- Perform analytical reviews of transactional activity to identify unusual behavior, potential fraud indicators, and opportunities for improved monitoring and operational controls.
- Perform data validation, reconciliation, and quality checks to improve data accuracy, consistency, and reliability for operational analysis and reporting.
- Prepare analytical reports and structured insights to support performance monitoring, issue resolution, risk assessment, and management decision-making.
- Collaborate with cross-functional teams to investigate data-related issues, identify root causes, resolve operational challenges, and improve analytical processes.
- Identify recurring patterns and process inefficiencies and support initiatives focused on automation, workflow optimization, and improved operational outcomes.

The Gainers Apr 2025 – Jun 2025

Finance Intern

- Conducted investment and market research using financial datasets, performance indicators, risk-return metrics, and comparative analysis to generate actionable investment insights.
- Analyzed mutual fund and equity performance to identify trends, relationships, risk characteristics, and performance drivers.
- Evaluated investor profiles, financial objectives, and risk appetite to support data-driven asset allocation and investment product analysis.
- Prepared analytical reports and research summaries translating financial data into concise insights for portfolio and investment decisions.

Ericsson Global Service India Pvt Ltd Aug 2022 – Aug 2023

Associate Domain Support Specialist

- Analyzed operational and system datasets to identify anomalies, recurring patterns, performance trends, and process-level issues.
- Performed data reconciliation and validation to improve data quality, reporting accuracy, and consistency across operational processes.
- Improved process efficiency by optimizing workflows and reducing issue resolution time by 15%.
- Prepared KPI, trend, and performance reports to convert operational data into actionable insights for management decision-making.
- Conducted root-cause analysis of recurring issues and collaborated with cross-functional teams to develop data-driven process improvements.
- Trained new employees and streamlined onboarding processes, improving productivity, knowledge transfer, and process consistency.

PROJECTS

Fraud Detection Analysis (Python, SQL)

- Analyzed transaction-level data using Python and SQL to identify suspicious patterns, anomalies, behavioral indicators, and potential fraud signals.
- Applied exploratory data analysis and statistical techniques to identify meaningful patterns and support data-driven fraud prevention decisions.
- Developed analytical logic to distinguish unusual transaction behavior from normal activity and identify high-risk observations.

Machine Learning and Predictive Analytics

- Applied supervised and unsupervised machine learning concepts to financial datasets for classification, prediction, segmentation, and pattern discovery.
- Explored regression, decision trees, random forest, clustering, and artificial neural network approaches to identify relationships and predictive patterns in data.
- Evaluated model outputs and analytical findings to translate quantitative results into interpretable business insights.

Credit Risk Analysis (Excel, SQL)

- Analyzed customer financial data to identify high-risk profiles, repayment patterns, credit indicators, and potential default signals.
- Used financial and customer-level variables to identify relationships between customer characteristics and credit risk outcomes.

Scenario-Based Portfolio Optimization under Geopolitical Risk

- Conducted quantitative scenario analysis to evaluate the impact of geopolitical events on Indian equity securities and portfolio risk.
- Compared portfolio performance and risk characteristics under alternative scenarios and used Excel Solver to optimize portfolio allocation.

Financial Modeling and Valuation (DCF)

- Built financial models using discounted cash flow methodology and performed sensitivity analysis to evaluate the impact of key assumptions on valuation outcomes.

KEY SKILLS

Data Science & Machine Learning: Machine Learning, Predictive Analytics, Statistical Analysis, Regression Analysis, Classification, Clustering, Decision Trees, Random Forest, Exploratory Data Analysis, Pattern Recognition, Anomaly Detection

Programming & Analytics: Python, SQL, Advanced Excel, Power BI, VBA, Pivot Tables, VLOOKUP, Data Cleaning, Data Validation, Data Reconciliation, Data Analysis, Automation

Business & Customer Analytics: Customer Analytics, Behavioral Analysis, Fraud Analytics, Risk Analytics, Financial Analytics, Trend Analysis, Segmentation, Performance Analysis, Business Insights, Data-Driven Decision Making

Statistical & Quantitative Analysis: Statistical Modeling, Quantitative Analysis, Scenario Analysis, Sensitivity Analysis, Correlation Analysis, Risk-Return Analysis, Financial Modeling, Forecasting

Financial Analytics: Financial Analysis, Investment Research, Portfolio Analysis, Credit Risk Analysis, Fraud Risk Analysis, Valuation, Market Research, Performance Analysis

Professional Skills: Critical Thinking, Problem Solving, Analytical Thinking, Stakeholder Management, Cross-Functional Collaboration, Communication, Research, Project Coordination, Prioritization, Attention to Detail

CERTIFICATIONS

- AI/ML Basic Training
- Power BI
- Certificate in Financial Modelling and Valuation (Fortune)
- Financial Modelling – Bonus Case Studies (Fortune)
- Microsoft 365 Excel (Fortune)
- MS Excel Essentials (Fortune)
- Visual Basic for Applications (Fortune)
- Finance Foundation
- Accounting for Non-Accountants
