AML Analyst

Profile

AML/KYC Analyst with 7+ months of transaction monitoring and customer account review experience in wealth management operations, plus one year of operations analytics at Ericsson (15% faster issue resolution). Identifies suspicious patterns, documents investigations clearly and escalates risk per compliance procedures. Uses SQL, Python, Advanced Excel and Power BI to turn transaction data into risk insight.

Core Skills

AML and KYC: AML, KYC, Transaction Monitoring, Customer Account Review, Alert Review, Risk-Based Escalation
Investigation: Suspicious Activity Analysis, Case Documentation, Root-Cause Analysis, Fraud Detection
Data and Tools: SQL, Python, Advanced Excel, Power BI, VBA, Data Validation, Reconciliation

Work Experience

Transcom Mar 2026 – Present
AML/KYC Operations Analyst (Wealth Management)

- Conduct AML/KYC transaction monitoring and customer account reviews to identify suspicious patterns, anomalies, unusual activity and potential financial crime risks.
- Investigate flagged transactions, document findings accurately and support risk-based escalation per compliance procedures; analyse behavioural data to surface fraud signals and cases needing further review.
- Perform data validation and reconciliation across customer, transaction and operational records to keep them accurate, complete and consistent.
- Prepare risk, compliance and management reports on investigation outcomes, recurring risk patterns and transaction trends.
- Collaborate with internal teams to resolve complex cases and discrepancies and support timely case closure, while maintaining documentation for audit readiness.

Ericsson Global Service India Pvt Ltd Aug 2022 – Aug 2023
Associate Domain Support Specialist

- Reduced issue resolution time by 15% by optimising workflows and strengthening process controls.
- Analysed operational data to identify anomalies and process risks; performed reconciliation and validation to improve reporting quality and controls.
- Conducted root-cause analysis with cross-functional teams and produced KPI, issue and trend reports for management.
- Trained and onboarded new employees, improving team productivity and process consistency.

The Gainers Apr 2025 – Jun 2025
Finance Intern

- Researched risk-return profiles, market trends and financial products; evaluated investor risk appetite to support asset allocation and prepared analytical reports for management.

Financial Crime and Risk Projects

Fraud Detection Analysis Python, SQL
Analysed transaction-level data to flag anomalous behaviour and potential fraud indicators, using exploratory data analysis to support investigation decisions.

Credit Risk Analysis Excel, SQL
Assessed customer financial data to identify high-risk profiles, repayment behaviour and default signals using risk metrics.

Scenario-Based Risk Analysis Excel Solver
Modelled the impact of geopolitical events on Indian equities and optimised portfolio allocation to minimise variance.
