SUMMARY

PGDM (Finance) professional with experience in financial analysis, operational analysis, process improvement, data reconciliation, risk assessment, investment research, and performance reporting. Experienced in analyzing operational and financial data, identifying process inefficiencies, evaluating performance metrics, supporting management decision-making, and improving workflows. Strong exposure to financial modeling, benchmarking, portfolio analysis, scenario analysis, cost and performance evaluation, and data-driven problem solving. Proficient in Advanced Excel, SQL, Power BI, Python, and VBA with strong analytical, research, reporting, and stakeholder coordination skills.

EDUCATION

Fortune Institute of International Business (FIIB) 2024 – 2026

PGDM (Finance)
CGPA: 6.73/10

Institute of Technical Engineering and Research 2018 – 2022

Bachelor of Technology
CGPA: 7.63/10

WORK EXPERIENCE

Transcom Mar 2026 – Present

Wealth Management Associate Ops Analyst

- Analyze financial and operational data to identify process gaps, transaction anomalies, operational risks, and opportunities for process improvement.
- Review transaction and account activity to identify discrepancies, investigate operational issues, and support accurate and efficient financial operations.
- Perform data validation and reconciliation to maintain data integrity and improve the accuracy of operational reporting and management information.
- Prepare operational reports and analytical insights to support performance monitoring, issue resolution, and management decision-making.
- Collaborate with cross-functional teams to resolve process issues, improve workflows, and strengthen operational controls.
- Analyze recurring operational issues and identify opportunities to streamline processes, reduce manual effort, and improve service efficiency.
- Apply analytical and problem-solving skills to support process optimization and data-driven decision-making in a fast-paced financial environment.

The Gainers Apr 2025 – Jun 2025

Finance Intern

- Conducted financial and investment research to evaluate financial products, market performance, risk-return characteristics, and portfolio suitability.
- Analyzed mutual funds and equity securities using financial indicators, performance trends, comparative analysis, and risk metrics.
- Supported asset allocation and SIP planning by evaluating financial objectives, risk appetite, investment suitability, and portfolio requirements.
- Prepared financial analysis and research reports to support portfolio evaluation, investment decisions, and management discussions.

Ericsson Global Service India Pvt Ltd Aug 2022 – Aug 2023

Associate Domain Support Specialist

- Analyzed operational and system data to identify process inefficiencies, performance gaps, data inconsistencies, and operational risks.
- Improved process efficiency by optimizing workflows and reducing issue resolution time by 15%.
- Performed data reconciliation and validation to improve reporting accuracy, data integrity, and consistency across operational processes.
- Prepared KPI, performance, and trend reports to support management decision-making and operational performance monitoring.
- Conducted root-cause analysis of recurring operational issues and collaborated with cross-functional teams to develop process improvements.
- Identified opportunities to streamline workflows, improve service delivery, and strengthen process controls.
- Trained new employees and streamlined onboarding processes to improve productivity, process consistency, and operational efficiency.

PROJECTS

Scenario-Based Portfolio Optimization under Geopolitical Risk

- Conducted scenario-based financial analysis to evaluate the impact of geopolitical events on Indian equity securities and portfolio risk.
- Compared portfolio performance and risk characteristics under alternative market scenarios to support risk-sensitive investment decisions.
- Applied Excel Solver to optimize portfolio allocation and minimize portfolio variance under different risk scenarios.

Financial Modeling and Valuation (DCF)

- Built financial models incorporating revenue, expense, cash flow, valuation, and sensitivity analysis to evaluate financial performance under alternative assumptions.
- Performed sensitivity analysis to assess the impact of key operating and financial assumptions on valuation outcomes.

Credit Risk Analysis (Excel, SQL)

- Analyzed customer financial data to evaluate credit quality, repayment trends, risk indicators, and potential default exposure.
- Applied financial and risk metrics to identify high-risk profiles and support data-driven risk assessment.

Fraud Detection Analysis (Python, SQL)

- Analyzed transaction-level data to identify anomalies, unusual patterns, operational risks, and potential fraud indicators.

KEY SKILLS

Operational Due Diligence: Operational Analysis, Process Assessment, Performance Analysis, Process Mapping, Operational Risk Assessment, Data Validation, Data Reconciliation, Process Improvement

Financial Analysis: Financial Analysis, Financial Modeling, Financial Benchmarking, Cost Analysis, Variance Analysis, Profitability Analysis, Cash Flow Analysis, Ratio Analysis, Valuation, Investment Analysis

Performance & Value Creation: Performance Improvement, Cost Optimization, Operational Efficiency, Workflow Optimization, KPI Analysis, Trend Analysis, Root Cause Analysis, Scenario Analysis, Value Creation

Risk Analysis: Risk Assessment, Credit Risk, Operational Risk, Financial Risk, Portfolio Risk, Fraud Risk, Risk Monitoring, Risk Reporting, Scenario-Based Risk Analysis

Data & Technology: Advanced Excel, Pivot Tables, VLOOKUP, SQL, Python, Power BI, VBA, Automation, Data Analytics, Microsoft Office

Professional Skills: Critical Thinking, Analytical Problem Solving, Research, Attention to Detail, Stakeholder Management, Cross-Functional Collaboration, Reporting, Communication, Process Improvement

CERTIFICATIONS

- Power BI
- Finance Foundation
- Accounting for Non-Accountants
- AI/ML Basic Training
- Microsoft 365 Excel (Fortune)
- MS Excel Essentials (Fortune)
- Certificate in Financial Modelling and Valuation (Fortune)
- Financial Modelling – Bonus Case Studies (Fortune)
- Visual Basic for Applications (Fortune)
